Dose rates shown are based on manufacturers' literature for purchase planning. Be sure to follow the instructions on packaging or container when treating animals.

BACTO-COL RANGE

Features

- Specific protection against the primary recognised pathogens.
- Broad spectrum protection against secondary pathogens.
- Natural host specific probiotic bacteria.
- Products available in a range of forms: powder paste, capsules.
- Easy to administer.
- Tried, tested and proven.

Benefits

- Improves health and reduces disease challenge in young animals.
- Reduces secondary disease challenge in the gut.
- Competitive exclusion against pathogens.
- Products to suit all feeding and management systems.
- Convenient to use.
- Use with confidence.

Bacto-Col Products Contain:

1. Surface active specific proteins of known activity against the four main infectious pathogens in calves and lambs.
2. Bio-Mos prepared from the wall of a specific yeast which contains high levels of mannan-oligosaccharides. These sugars have been shown to reduce the ability of pathogens to attach themselves to the gut wall, whilst simultaneously stimulating the growth of beneficial bacteria.
3. Host-specific probiotic bacteria (which are naturally present in the intestine of all healthy animals) make it more difficult for pathogens to gain a foothold and colonise the gut wall. The acid they produce also makes the conditions in the intestine favourable for pathogens.
4. Colostrum replacers must be energy rich to maintain health and vigour. The energy must be in an easily digested and available form (i.e. oils and sugars). There are no higher energy products than Carrs Billington Colostrum Replacers.

Bacto-Col Product Range

LAMB COLOSTRUM REPLACER

8 dose pack
3272900 400g
3200057 2.5kg

High energy complete feed for newborn lambs, containing sugars and fats to help fuel heat production and prevent hypothermia.

Benefits

- Specific proteins – effective against the major cause of watery mouth.
- Probiotics and Bio-Mos – reduces the challenge from harmful bacteria and promote the growth of beneficial bacteria.

BACTO-COL LAMB BOOSTER

3200094 240ml
 A unique nutritional supplement of specific proteins, vitamins and energy for weak and susceptible lambs.

Benefits

- Instant energy
- Specific proteins – effective against the major cause of watery mouth.
- Vitamins – A, D3, E, B1, B2, B3, B6, B12 – boosts the immune system and improves the utilisation of energy.
- Probiotics – stimulate the growth of beneficial bacteria.

Administer oral to the back of animals mouth as soon as possible after birth. Repeat daily if required or at period of risk.

CALF COLSTRUM REPLACER

2 x 200g twin dose
3276300 pack

Complete first feed for the colostrum deficient newborn calf.

BACTO-COL CAPSULES

3286900 20

A concentrated specific protein supplement in capsule form for newborn or bought-in calves.
