

Vaccines

Cattle Vaccines & Antisera

COVEXIN 8 COMBINED CLOSTRIDIAL VACCINE **PML**

3901100 100ml Cattle immunisation against pulpy kidney, braxy, blackleg (incl. post-parturient gangrene), struck, black disease, tetanus and disease due to Clostridium Oedematiens Type D. *Cattle dose: 5ml Revaccination is required at six monthly intervals for continuous protection but where there is no period of risk in the winter, annual revaccination is all that is necessary.*

Sheep Clostridial Vaccines

COVEXIN 8 COMBINED CLOSTRIDIAL VACCINE **PML**

3901100 100ml For the active immunization of sheep and cattle against
3901200 250ml lamb dysentery, pulpy kidney disease, braxy, blackleg
3901300 500ml (including post-parturient gangrene), struck, black disease, tetanus & disease due to Clostridium Oedematiens Type D. *Sheep dose: Initial injection of 5ml followed by another of 2ml not less than 6 weeks later establishes protection. All subsequent doses are of 2ml.*

HEPTAVAC **PML**

3902000 100ml For vaccinating sheep and lambs against Lamb dysentery, pulpy kidney, braxy, blackleg, black disease, struck, tetanus and clostridial metritis. 2 doses normally required. *Dose: 2ml.*

HEPTAVAC - P PLUS (with IRP)* * **PML**

3901900 50ml For sheep/lamb vaccination against lamb dysentery, pulpy kidney, braxy, blackleg, black disease, struck, tetanus, clostridial metritis and pasteurellosis caused by P. haemolytica serotypes A1, A2, A6, A7, A9, T3, T4, T10 and T15. *2 doses normally required. Dose: 2ml.*

**** with IRP** – The 'PLUS' range of vaccines contain Iron Regulated Proteins (IRP)- these antigens improve protection against the nine strains of Pasteurella already included and have been shown to provide cross protection against strains not included in the vaccine. Used in conjunction with good flock management, these new vaccines are said to dramatically reduce pasteurella related deaths from both P. haemolytica and P. trehalosi.

OVIVAC P PLUS (with IRP)* * **PML**

3903500 100ml For vaccination against pulpy kidney, braxy, blackleg, tetanus and pasteurellosis due to P. haemolytica serotypes A1, A2, A6, A7, A9, T3, T4, T10 & T15. *2 x 2ml doses normally required.*

Sheep Pasteurella Vaccines

OVIPAST (with IRP)* * **PML**

3903200 100ml For vaccinating sheep against Pasteurellosis due to P.
3903300 500ml haemolytica serotypes A1, A2, A6, A7, A9, T3, T4, T10 and T15. May also be used for vaccination of lambs to protect them against pasteurellosis where this occurs from 4 weeks of age. In both cases 2 x 2ml doses are normally required. Footrot & General Sheep Vaccines

FOOTVAX **PML**

3901500 50ml For the vaccination of sheep against footrot caused by
3902600 20ml Bacteroides Nodosus. *Dose: 1ml (50 doses/pack).*
3901800 250ml

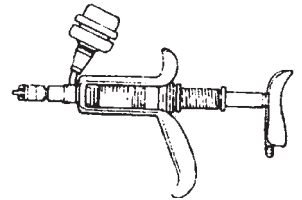

Vaccinators

DISPOSABLE AUTO VACCINATOR

Without auto sterilisation Plastic, fully adjustable 5ml auto syringe for use with vaccines and antisera supplied in flexible bottles. Comes with draw-off system and injection needle sterilised by gamma radiation, with or without automatic needle sanitising.

PHILLIPS 5ml AUTOMATIC VACCINATOR

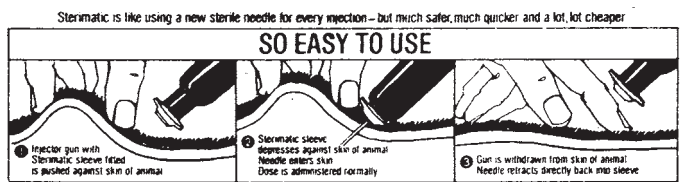

3246800
 Vaccinator with bottle attachment, luer lock fitting. Range 0-5ml x 1/2ml. Repeats until vaccine container is empty.

Noted for sturdiness and ease of operation, requires only gentle squeeze to administer dose. Needle locking device secures needle onto mount, so it cannot be accidentally dislodged. Can be sterilised without dismantling.

STERIMATIC SANITISING

3256800 Kit Auto needle sanitising system which cleans the needle of all access causing bacteria and over 99% of blood transmitted viruses. 50 injections/refill, fits all popular multi-dose injection guns.

Hypodermic Syringes & Needles

DISPOSABLE SYRINGES

3222600 Luer 2ml Sterile disposable syringes.
3222700 Luer 5ml
3222800 Luer 10ml
3222900 Luer 20ml
3223000 Luer 60ml

NYLON SYRINGES

Syringe Strong plastic fully sterilisable syringes.
32450 Record 5ml
32451 Record 10ml
32452 Record 20ml
32453 Record 50ml

DISPOSABLE NEEDLES

3243000 Per 100 Selection of sizes, 100's per size.

HYPODERMIC NEEDLES

3243100 .. Record fitting Reusable needles, sizes 1/2" to 1"
3243200 Luer lock
