

Fertilisers

Carrs Fertilisers are committed to offering the highest quality in all aspects of products and services.

Advice on making the right choice when buying fertiliser is available.

‘Making the *Right Choice*’

Introduction

Carrs Fertilisers, a sister company of Carrs Billington Agriculture Ltd, is the most broad based, innovative fertiliser business in the UK. Operating from plants at Invergordon, Montrose and Silloth, Carrs Fertilisers are well placed to service the needs of all of Carrs Billington Agriculture’s farmer customers.

Fertilisers – Making the Right Choice

The increasing economic and environmental pressures faced by farmers have been highlighted recently by the proposal to increase the area of Nitrate Vulnerable Zones (NVZ’s) throughout the U.K.

Farmers should consider the following before making their fertiliser choice:

- soil nutrient status;
- soil nitrogen supply (SNS);
- nutrient inputs from organic manures;
- crop nutrient offtake;
- crop nutrient residues, etc.

Through our new range of analytical and advisory technical services (see Technical Services below), Carrs Fertilisers can ensure that farmers *make the right choice* when buying fertiliser, offering *genuine value for money*.

Products

‘New Choice’

- New Choice optimises production by maximising nutrient recovery.
- New Choice products contain significant quantities of calcium and magnesium and also traces of copper, cobalt, selenium, zinc and manganese to improve soil, plant and animal health. Sulphur, sodium and boron are also added where there is a crop need.
- New Choice is available with Selcote Ultra®, the unique form of sustained release selenium which provides an annual supply of selenium from a single application.

‘Field Choice’ – quality, granular blends

- Carr’s well known and established range of market leading, high quality blends, which are all based on either granular CAN or SP5 AN from Terra.
- Field Choice blends are size and density matched, top and bottom screened and oil coated to give clean, dust free and even sized product for uniform spreading.

‘First Choice’ – complex compounds

- Carr’s own range of high quality, complex compound NPK fertilisers, manufactured to an exacting specification giving consistently excellent product and performance.

‘Scotphos’ – the natural choice

- Scotphos is the leading brand of speciality, powder and granular P and PK fertilisers based on Gafsa Reactive Rock Phosphate (RPR) from Tunisia, which is rich in phosphate, calcium, magnesium, sulphur and a wide range of trace elements.
- Scotphos products are ideal for building and maintaining soil fertility. The Scotphos PK range can, in conjunction with straight N, be used as an alternative fertiliser system in its own right.

‘Multi Choice’ – the natural way

- Multi-Choice is a semi-organic fertiliser designed for equine pastures, amenity trees and shrubs, flower beds, fruit and vegetables and lawns. Available from your local Carrs Billington branch in convenient, easy to handle 25 kg bags.

Forestry

- Fertilisers for amenity trees can be sourced in convenient 25 kg bags from your local Carrs Billington branch.

Services

Technical – analysis and advice

- Carrs Fertilisers offer a wide range of soil, plant tissue and organic manure analysis as a basis for making the right choice in buying fertiliser.
- Carrs Fertilisers FACTS trained field staff can offer advice which, together with the analysis packages above, ensure you are using the right fertiliser.

Packaging

- Package options range from 25 kg bags up to 500 kg top lift IBC’s.
- ‘Four Pack’ is the innovative, weatherproof pack from Carrs Fertilisers. Four 500 kg bags are stretch wrapped onto a disposable pallet to allow outside storage on farm.

Spreading

- Carrs Fertilisers can arrange a bulk delivered and spread service (including aerial spreading) in many parts of the country through a network of local, reputable contractors. This service saves time and money for busy farmers.

Delivery

- Carrs Fertilisers offer a comprehensive farm delivery service to Carrs Billington’s farmer customers through a network of local, professional and appropriately trained and qualified hauliers.

Quality

Carrs Fertilisers are committed to offering the highest quality in all aspects of our products and services, which are backed by our Quality Assurance.

Carrs Fertilisers production and delivery is registered to ISO 9001, the internationally recognised quality assurance scheme.
